

# PURCHASING

## Microsoft Dynamics™ SL

### Benefits

- Make smarter choices**  
 Provide instant access to purchasing information. Flexible vendor ID structures provide meaningful identification and help you analyze vendor performance for more informed decisions.
- Work the way you want**  
 Flexible setup options fit the way you work and can be changed as your operations evolve. Define default shipping addresses, printing options, and data retention periods. Or, specify default general ledger accounts and decimal precision options.
- Gain efficiency**  
 Enter purchase orders, receipts, and vouchers — at the most sensible times in the cycle — quickly and easily through the seamless integration of information inherent in all Microsoft Dynamics SL modules.
- Streamline processes**  
 Enter simple purchase orders with only three pieces of information: vendor ID, inventory item ID, and quantity. Everything else — including unit cost, unit of measure, and account/sub-account information — is entered by default, based on your business rules.
- Maximize buying power**  
 Make informed decisions using a variety of targeted reports that help you negotiate the best prices by understanding what products and services your company needs, the right time to order them, and the best vendors.

Boost productivity and reduce transaction costs with increased purchasing accuracy, speed processing, streamlined receiving, and efficient invoice matching and vouchering. Microsoft Dynamics SL Purchasing provides buyers with accurate, up-to-date vendor and pricing information to help them make consistent, cost-effective buying decisions.

**Straightforward**  
*and easy to use, buyers can work smarter and faster with instant access to information and streamlines order processing.*

The screenshot shows the 'Purchase Orders (04.250.00)' window. It includes fields for PO Number (<NEW>), PO Type (Regular Order), Company (0060), Vendor ID (VT0120), Status (Completed), Project (W000006), and Blanket/Std PO Nbr. Below these fields is a table of line items:

Purchase For *	Inventory ID *	Site ID *	Quantity	UOM *	Unit Cost	Extended Cost	Unit Weig
Goods for Inventory	CAR01	HQ	27 EA		14.000	378.00	
Goods for Inventory	PLANE01	HQ	19 EA		12.000	228.00	
Goods for Inventory	HORSECART01	HQ	22 EA		11.000	242.00	
Goods for Inventory	HORSEH0BB	HQ	143 EA		5.000	715.00	
Goods for Inventory	HORSEWHEEL01	HQ	3 EA		9.000	27.00	

At the bottom, there are buttons for 'Find Item', 'Receipt/Voucher', 'Sales Orders', and 'Print'. The 'Total Amount' is displayed as 1590.00. The user is SYSADMIN and the date is 10/30/2003.

**Easily identify**  
*whether order items are for inventory or internal use, such as office supplies.*

## FEATURES

## BENEFITS

---

### Instant Updating

Update inventory immediately, rather than when the vendor's invoice arrives. Simply enter the packing slip PO number when an order arrives to create a receipt on the spot.

---

### One-Step Invoice Accounting

Create accounts payable vouchers automatically when purchase orders are received, helping eliminate redundant data entry.

---

### Targeted Reports

Create reports with Crystal Reports and save in various formats, including Microsoft Office Excel, Microsoft Office Word, IBM's Lotus, Open Database Connectivity (ODBC), and HTML. Reports include purchase order register, purchase order status/history, and anticipated deliveries.

---

### Multiple Order Type/Addresses

Bill any type of order to one address and ship it to another. Purchasing supports multiple ship-to addresses as well as a variety of order types, including regular, standard, blanket, and drop ship orders.

---

### Flexible Receipt Processing

Track open orders, override unit costs, and receive quantities larger than original orders. Units of measure, which can differ from an item's stock unit, are automatically converted on receipt to stock unit measures, to update inventory accurately.

---

### Robust Integration

Microsoft Dynamics SL Purchasing integrates with other Microsoft Dynamics SL modules, including Accounts Payable, Inventory, and Order Management, to reduce redundant data entry and improve overall efficiency.

---

### Inventory/Non-Inventory Identification

Distinguish between stock and non-stock items by indicating on the PO whether items are for internal use, such as office supplies, or for inventory, such as resale or production items.

---

### Change Order Support

Maintain comprehensive, long-term records on purchase order activity, including up to 99 change orders such as quantity, price, and shipping instructions.

---

### User-Specified PO History

Specify during setup how long you want to keep information stored in your Purchasing system. Purchasing supports up to 99 periods of transaction detail.
